

SH GROWER 35

Mineralic ion exchanger for efficient biodegradation actions in waste waters.

Mineralic ion exchanger specifically formulated to accelerate the reactions of

Mineralization of organic substrates in all sewage water environments. The product activates biodegradation action of the organic residues present in the waste waters and sediments, allowing for their mineralization. In this manner the eutrophication and anoxia of the Nitrogen and Phosphorus cycles.

And now ion exchange is widely used in pollution control.
